### Tele lenses 35mm Century // GL-Optix + Extender Cent./Alura/IBE // Expander Tokina 1.6

Artikel	Tag	Woche
---------	-----	-------

<p>Tokina Cinema ATX Expander 1.6 x PL zu PL 8K Sensors Capable</p> <p>Tokina created the 1.6x Expander so that cinematographers can use their favorite Super35 PL lenses on the latest full-frame 6K/8K cameras. The Expander increases the diameter of image circle by 1.6x on Super35 PL prime and zoom lenses. This allows for a greater variety of lens choices when filming with cameras like the RED Dragon that has a 46.31mm (8K) diagonal sensor.</p> <p>Tokina engineers gave special attention to the 7-element optical design to ensure the integrity of the original lens's performance and to keep light fall off to a manageable 1.36 stops. The all mechanical design is robust, durable, and lightweight.</p> <p>The Tokina 1.6x Expander performs best when used with lenses that have a T2.0 or larger aperture and when the lens is stopped down to T2.8 or smaller.</p>	50,00 EUR	150,00 EUR
