MINI35 Digital®

Crossing new frontier in Mini DV format

With the Mini35 Digital image converter, P+S Technik has developed a new work tool that offers the chance to create visual effects in video which so far could only be obtained in film.

Product Info

Features:

- The Mini35 Digital image converter allows the use of film or still photographic lenses on DV cameras.
- The image recorded through the Mini35 Digital image converter preserves the focal length, depth of field and angle of view of the 35mm film format.
- The Mini35Digital image converter is available for the **Canon XL1, XL1s and the Sony DSR PD150, VX1000, VX2000 and Panasonic AG-DVX 100**
- For handheld use, the image converter is fitted with an adjustable side handgrip and an integrated shoulder rest.
- The available ergonomic holder for the Canon viewfinders improves the balance and comfort of the camera.
- Optional carbon or aluminum 15mm rods allow the use of all lightweight cine accessories.
- The base of the image converter is fitted with a standard 3/8mm thread for compatibility with most tripods and studio support systems.
- Rugged aluminum construction, allow the use of heavy lenses.
- Interchangeable mounts: PL, Nikon, Canon EF, Panavision, Leica R, ZeissContax, are currently available.
- One image converter can be configured to be used with either the **Canon XL1, XL1s or the Sony DSR PD150, VX1000, VX2000 or the Panasonic AG-DVX100** cameras through the availability of optional modular kits.

Order Information Mini35Digital
